

PROFESSIONAL SUMMARY

Web & Frontend Developer with hands-on experience building conversion-focused, SEO-driven websites and internal tools. Strong background in frontend development (HTML, CSS, JavaScript, React), WordPress, and on-page SEO, with practical experience using Google Analytics and Google Search Console to guide technical and structural decisions. Built and currently developing an AI-powered SEO automation tool focused on content generation, page analysis, and workflow optimization. Comfortable working across frontend, backend (Node.js, Express), and data-driven systems, with a strong focus on real-world impact.
